

EVOKUP : The Soft Cup

Reusable for life

« You will have no reason to throw away a disposable cup »

EvoKup : « What is it ? »

EvoKup is a new concept of a **completely flexible** glass, ultralight and reusable, ideal to take it everywhere and in any of your pockets. Its design is ergonomic, with two retention loops for greater stability in the hand. With a capacity of 250 ml and **only 10 grams of weight**, the EvoKup is made of a resistant thermoplastic, which complies with all current sanitary regulations. This revolutionary material is super **resistant to tearing and temperatures** (-40C to 100C), so your EvoKup can contain both cold and hot liquids and can be washed in a dishwasher.

« Why use EvoKup ? »

Each year in each country **more than 5 billion disposable cups are discarded**, and 70% of them end up in our oceans. Thanks to its characteristics, EvoKup becomes your best ally to replace the use of disposable cups and thus **contribute to reduce the plastic waste we produce**. For example, in a company with 10 employees who drink about 4 drinks a day, they consume about 800 disposable cups per month, or 10,000 per year, not including all the other glasses they use outside the office. **With Evokup you use the plastic in a conscious and sustainable way**, while you are aware of the ephemeral use of disposable

« When use EvoKup ? »

EvoKup can be used in a wide range of activities: either at work or during breaks for a coffee or when you go out on nature trails. Always carry it with you, in your bag for the beach, in your backpack for the concert, wherever, EvoKup accompanies you.

« How much does it cost ? »
